*Participation in Environmental Organizations* Benno Torgler,Maria A. Garcia-Valiñas,Alison Macintyre,2010-07-02 For decades, social scientists have searched for factors that shape pro-environmental behaviour. However, only a few studies have investigated the causes and consequences of participation in environmental organizations. This book fills the gap by analysing in detail the determinants of environmental participation and its consequences in different parts of the world. Benno Torgler, María A. García-Valinas and Alison Macintyre seek the answer to several questions regarding who is working towards positive outcomes for our environment, what sort of social and institutional context will assist voluntary participation, what sort of attitudes are related to positive environmental behavior, and which countries are active on the intergovernmental stage. By focusing on voluntary participation in environmental organizations, we are able to determine the level of willingness to work towards a solution for environmental problems. This allows an insight into the motivations and attitudes of individuals and nations and how these factors can affect environmental cooperation. Participation in Environmental Organizations sheds light on who is liable to participate and will help to see whose priorities and values are forwarded through voluntary activities and to what extent voluntary participation can become representative. Thus, the book provides a unique examination of citizens' willingness to participate in environmental organizations. The book will be of interest to Economics students and researchers alike who seek a deeper understanding of the theory and practice of environmental participation.

**Regulierung finanzieller Referenzwerte** Kristina L. Gütte,2020-06-26 Referenzwerte finden breite Verwendung in Finanzinstrumenten und Verträgen. Trotz ihrer weitreichenden Integration in das Finanzsystem bedurfte es des Bekanntwerdens verschiedenster Manipulationen, bis dieser bedeutsame Bereich in den Fokus von Gesetzgebern und Aufsichtsbehörden ruckte. Die 2014 erfolgte Ergänzung der VO (EU) 596/2014 (MAR) um ein Verbot der Referenzwertmanipulation sah erstmals explizit die Sanktionierung von Manipulationen vor, adressierte jedoch nicht den kritischen Wertschöpfungsprozess von Referenzwerten. Zur Beseitigung dieses regulatorischen Vakuums wurde 2016 die VO (EU) 2016/1011 (BMR) erlassen, die einen umfassenden aufsichtsrechtlichen Rahmen für Referenzwerte etabliert. Unter Einordnung der BMR in das Gesamtbild des europäischen Kapitalmarktrechts und die internationalen Reformbestrebungen setzt sich Kristina L. Gutte kritisch mit dem durch die BMR geschaffenen Rechtsrahmen für Referenzwerte auseinander und zeigt an zahlreichen Stellen Umsetzungsmöglichkeiten für die Praxis auf.
